

Digital Photography Workshop

Camera to Print with Photoshop Elements

At the Old Firehouse Gallery, 108 N. George St, Charles Town, WV

Saturday, March 13, 9am – 4pm

Instructor: Sterling “Rip” Smith

Today even a modest digital camera is capable of excellent images and there is a wide range of software tools available to help us realize the potential of today’s digital camera technology. While Adobe Photoshop CS4 is the number one image editing tool, at \$650 it is much more expensive than the average photo enthusiast needs to spend. Photoshop Elements is a somewhat scaled down version that is still an extremely powerful image editor that is capable of serious work. The current version of Photoshop Elements for less than \$100 provides more features and power than the full Photoshop version of just a few years ago.

This one-day workshop will cover:

Uploading your images to your computer	The Photoshop Elements Advanced Editor
Image Management	Levels and Contrast
File formats	Shadows & Highlights
Raw vs JPEG	Color Correction
Basic “Quick” Editor	Cropping
Optimizing images for prints	Image sharpening
Optimizing images for email	Perspective and Distortion Correction
Optimizing images for the Web	Special Effects

This will be a hands-on workshop. If you have a laptop computer, please bring it. It will be helpful if you have the latest version of Photoshop Elements (version 8) installed. The trial version can be downloaded from adobe.com. If necessary, a trial version of the software will be provided.

Workshop fee: \$60.00

Preregistration required, Maximum of 10 seats available.

To register please provide the following information:

Name: _____

Address: _____

City, State, Zip: _____

Phone Number(s): _____

Email Address: _____

What digital camera(s) do you use? _____

What software tools do you use? _____ PC or Mac?

How did you learn about this workshop? _____

Please make check to: Sterling Smith and mail to PO Box 969, Martinsburg, WV 25402-0969
